ENVIRONMENTAL, HEALTH AND SAFETY (EHS) POLICY

General Dynamics Robotic Systems (GDRS) is committed to protecting human health, natural resources, and the environment while promoting and maintaining safe workplaces and practices for our employees, customers, suppliers, visitors and other stakeholders.

We all have a shared responsibility to identify activities that present significant environmental, health and safety (EHS) impacts/risks, and to take corrective/preventative actions in an effort to eliminate those potential impacts/risks.

We are committed to continual improvement, prevention of pollution, improving health and safety performance and complying with applicable environmental, health and safety laws, regulations, ordinances and other requirements to which GDRS subscribes. Through this commitment we will develop strategic initiatives and processes that at minimum:

- Frequently assesses the potential environmental impacts and health and safety risks of operations, processes and products.
- Implement proactive policies and procedures to comply with applicable EHS legislation and regulations and other requirements to which the company subscribes.
- Reduce work related illness and injuries.
- Conserve natural resources.
- Reduce the use of hazardous material.
- Reduce the generation of hazardous wastes, pollutants, and by-products.
- Recycle material whenever possible.
- Implement appropriate technologies for the prevention of pollution, and the control of pollutants that cannot be eliminated.

The foundation of our EHS program is participation, empowerment, and training. We all share the responsibilities to follow established policies and procedures, identify and report potential EHS concerns; maintain relevant documents, and knowing the emergency procedures, and evacuation plans at our facilities.

We are committed to an organizational culture that protects the health and safety of our employees and preserves the environment for future generations.
